

ZMO150

Digital dimming, analogue price

Zano is back with the **ZMO150** – our best technology, at our lowest price. We’ve built all of our latest LED dimming innovation into this 0-150W dimming module. With the Zano smart settings, learn and adapt technology, easy-fit installation and even greater lamp compatibility ZMO150 delivers flicker-free and silent dimming on every 0-150W LED installation – all for the recommended retail price of £24.

Tech advice: Installing smart settings
Low-end flicker, drop out, lamps out of sync with each other or failing to turn back on... these

LED headaches have a big impact on user experience and result in unnecessary call outs. Yet there’s no need to put up with them. All of these common complaints can be fixed with Zano’s smart settings.

Simple to programme and designed not to revert to programming mode once installed, Zano smart settings enable you to set the minimum level, start level and boost level on every Zano dimmer, ensuring the ultimate user experience with flicker-free and silent dimming every time.

TOP TIP

Perfect for projects with a tight budget
